- Products used in more than 90 countries and 25 languages
- The MDAemon Windows-based email server is one of the most widely used servers on the Internet*

Customer Profile

Small-to-medium business/enterprise (SMB/SME) companies looking for an affordable messaging platform and a low TCO. Businesses with limited IT resources benefit from the easy-to-use design of its products, which can be quickly installed and require minimal administration and maintenance. Our customers exist in almost every industry segment, which include Legal, Healthcare, Government, Education and manufacturing, to name just a few.

Trusted Messaging Solutions

The mission of Alt-N Technologies is to listen to our customers and deliver the most feature-rich, affordable and secure messaging solutions in the industry. Alt-N Technologies was one of the first email developers to incorporate authentication and identity standards into its email platform. The company works with industry groups and associations on the latest security methods to ensure it is delivering the most secure and trustworthy email available.

Product Portfolio

MDaemon Messaging Server - designed for SMBs as a low cost alternative to Microsoft Exchange. Provides excellent mobility device support using ActiveSync or BlackBerry Enterprise Server (BES) for MDAemon. Includes groupware, Instant Messenger, and simple archiving features.

SecurityPlus for MDAemon - extends and offers an additional layer of protection for MDAemon through an additional Kaspersky Lab antivirus engine and Outbreak Protection from Cyren (formally Commtouch).

Outlook Connector for MDAemon - enables employees to use the collaborative functions of Microsoft Outlook without requiring the expense or expertise of the Microsoft Exchange server.

RelayFax Network Fax Manager - a powerful fax server that automates sending, receiving and managing network faxes, and integrates full faxing capabilities directly into your existing email system.

SecurityGateway for Email Servers - delivers reliable email security using a powerful spam filter that protects against malware. It offers intuitive features to analyze, manage and report on inbound and outbound email traffic patterns.

"MDaemon is loaded with features. I recommend it for those who need its unique features and want a high degree of configurability."

- Windows IT Pro

"I've been working with MDAemon for 8 years and, while the core product has remained as good as it always was, the rest of it has changed hugely. MDAemon provides a solid, standards-based email server, plus Calendar, Contact and message sharing within Outlook, an excellent (and constantly evolving) web mail interface, BlackBerry (BES & BIS) and ActiveSync connectivity, email anti-virus, and mailing lists."

- Spiceworks - User Review

"We have several installations, some as far back as 2000. It just works - intuitive, simple and very easy to trouble shoot and just keeps on working."
